SUBJECT: U.S. NUCLEAR REGULATORY COMMISSION APPROVAL LETTER FOR
WESTINGHOUSE ELECTRIC COMPANY TOPICAL REPORT TOPICAL REPORT
WCAP-16097-P-A, REVISION 3, "COMMON QUALIFIED PLATFORM TOPICAL
REPORT" (TAC NO. MF0898/WESTINGHOUSE REFERENCE LTR-NRC- 13-10
AND LTR-NRC-13-20)

Dear Mr. Gresham:

By letter dated February 28, 2013 (Agencywide Documents Access and Management System Accession No. ML13081A055), Westinghouse Electric Company submitted a proprietary version of the report WCAP-16097-P-A, Revision 3, "Common Qualified Platform Topical Report," for U.S. Nuclear Regulatory Commission (NRC) staff review. A corrected version of this report was submitted via letter dated March 26, 2013 (ADAMS Accession No. ML13112A105).

A nonproprietary copy of this document has been placed in the NRC's Public Document Room and added to the NRC Library in ADAMS and is available at Accession No. ML13112A108.

WCAP-16097-P-A, Revision 3, covers the Common Qualified (Common Q) platform which is a computer system consisting of a set of commercial-grade hardware and previously developed software components dedicated and qualified for use in nuclear power plants.

The report compiles information associated with the NRC staff's review of WCAP-16097-P-A, Revision 3; namely, it incorporates the NRC safety evaluation, makes clarifications, corrects identified standards, and fixes typographical errors. A list of these items compiled in the "Detailed Record of Changes" on page x of the report.

Based on its review of the changes documented in WCAP-16097-P-A, Revision 3, the NRC staff has determined that the WCAP-16097-P-A, Revision 3, report is acceptable to the extent delineated in the NRC staff's original approval letter, dated February 7, 2013 (ADAMS Access No. ML13022A124). The revisions to the topical report submitted in the approved copy do not affect the NRC's approval status of this topical report.

J. Gresham
