Dear Ms. Long;

This is in reference to your application [NRC Form 313] dated January 15, 2013 requesting to renew Nuclear Regulatory Commission License No. 47-25620-01. In order to continue our review, we need the following additional information:

1. Your application should have been signed by a management representative. Please submit NRC Form 313 signed by a management representative indicating that management has reviewed the application and concurs in the statements and representations contained therein. Note also that a management representative should sign all future correspondence that requests a change in your license.
2. Your application appears to indicate that your location of use may be controlled by an entity other than yourself. If so, please provide documentation of a clear contractual agreement concerning access to your location of use for the purpose of decontamination or removal of licensed material from the location of use in the event of disharmony between you and the owner entity. This documentation should consist of signed certification from both parties.
3. Please provide a description of the areas above and below your use and storage areas and show that adequate steps have been taken to assure that radiation levels in unrestricted areas will not result in doses to individual members of the public in excess of those specified in 10 CFR 20.1301.

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits, see our toolkit page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 A.M. to 5:30 P.M., Monday through Friday (except Federal holidays).
