Subject: Acceptance review for Turkey Point, Units 3 and 4, Relief Request #11 (TACs MF1391/92)
Importance: High

Bob,

By letter dated April 5, 2013 (Agencywide Documents Access and Management System Accession No. ML13114A294), Florida Power and Light Company (the licensee) submitted a request (Relief Request No. 11) to use alternative requirements for the reactor vessel nozzle to elbow/pipe dissimilar metal butt end welds examination for Turkey Point, Units 3 and 4. The purpose of this email is to provide the results of the U.S. Nuclear Regulatory Commission (NRC) staff's acceptance review of this relief request. The acceptance review was performed to determine if there was sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff reviewed your application and concluded that it does provide technical information in sufficient detail to enable the NRC staff to complete its detailed technical review and make an independent assessment regarding the acceptability of the relief request in terms of regulatory requirements and the protection of public health and safety and the environment. Given the lesser scope and depth of the acceptance review as compared to the detailed technical review, there may be instances in which issues that impact the NRC staff's ability to complete the detailed technical review are identified despite completion of an adequate acceptance review. If additional information is needed, you will be advised by separate correspondence.

If you have any questions, please contact me at 301-415-1447 or Audrey Klett at (301) 415-0489.
