General Comment

I OPPOSE this license to operate no matter what levels they intend to adhere to. HOW MANY ACCIDENTS IN THE WORLD DO WE NEED BEFORE YOU REALIZE THAT NUCLEAR POWER IS DANGEROUS and ALL NUCLEAR PLANTS SHOULD BE FAZED OUT! They are OLD and accidents WILL HAPPEN! This plant is designed just like the plant in FUKUSHIMA and we all know that they STILL don't have things completely under control there and who knows if they ever will! To allow this license is to say to Southern Californians that corporate profits come before safety. Instead of trying to kick a dying horse why not let it die already! Southern California Edison should be setting an example and leading the way by supporting much more clean energy than they are now. FAZE this plant out FOR GOOD and lets move into a clean energy future NOW!
