**Chairwoman Allison MacFarlane**  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555-0001

**RE: Safe Restart and Operation of San Onofre Nuclear Generating Station Unit 2**

**Position: SUPPORT**

The Murrieta Temecula Group strongly supports the safe restart and operation of the San Onofre Nuclear Generation Station (SONGS) Unit 2.

The Murrieta Temecula Group believes that Southern California Edison should be allowed to restart and operate SONGS as proposed in their Return to Services Action Plan if the Nuclear Regulatory Commission determines they have completed all the compensatory and corrective actions that been requested in the Confirmatory Action Letter.

The Murrieta Temecula Group is a group of proven community leaders dedicated to the social well being of the Murrieta Temecula area and its environs. through informed, collective and individual influence and actions. As concerned residents and business owners, we believe SONGS is a policy issue that impacts everyone in our region, their lifestyle and the success of their business. Without SONGS in operation, there is no comparable local source of energy to offset the loss that our businesses need to ensure a vibrant economy. Cost, lead time and environmental impact from developing new energy sources to fill that gap would be prohibitive and deleterious to the economic well-being of our region.

We urge you to publically support the Safe Restart and Operation of the San Onofre Nuclear Generating Station. If we can be of further assistance please feel free to contact us.

Respectfully,

Glen Daigle, President
