SUBJECT: SUMMARY OF PUBLIC TELECONFERENCE TO DISCUSS STATUS
OF WASTE CONFIDENCE GENERIC ENVIRONMENTAL IMPACT
STATEMENT AND RULEMAKING

On Wednesday, April 17, 2013, members of the U.S. Nuclear Regulatory Commission (NRC) staff held a Category 3 public teleconference at the NRC headquarters in Rockville, Maryland. The purpose of the teleconference was to maintain an open line of communication with the public by providing a status update on NRC staff's progress in developing the Waste Confidence draft generic environmental impact statement (GEIS) and Rule. Participants had an opportunity to ask questions and comment about the NRC's process and activities.

The meeting began at 1:30 p.m. and concluded at 2:30 p.m. EDT and was assisted by an operator who captured the name and organization of each participant, and moderated the individual phone lines. The NRC staff began the meeting with an overview of the NRC mission, a review of the timeline for Directorate activities, and an update regarding the availability of the speakers' presentations from the March 14, 2013, Waste Confidence session at the NRC Regulatory Information Conference (RIC) on the RIC website.

The NRC presentation continued with a discussion of the locations for 10 public meetings during the comment period for the Waste Confidence draft GEIS and Rule. These 10 public meetings will be held in the vicinity of the following areas: two meetings in the Washington, D.C. metropolitan area; one in the Boston, Massachusetts metropolitan area; one in the New York City metropolitan area; one in Denver, Colorado; one in Minneapolis, Minnesota; one near San Luis Obispo, California; one near San Clemente, California; one in Toledo, Ohio; and one in Charlotte, North Carolina.

The first and last meeting will be held in the Washington, D.C. metropolitan area at NRC Headquarters in Rockville, Maryland. These two meetings will be nationally webcast and accessible by a moderated teleconference line for members of the public who cannot attend one of the eight regional meetings. After discussing the meeting locations, the staff opened the teleconference for questions.

There were 72 participants in the teleconference representing members of the public, tribal and state governments, industry, public advocacy and environmental interest groups, and the NRC and its contractors. A list of meeting attendees is attached.

There were a variety of concerns, questions, and issues discussed by the public and NRC staff during the teleconference that included: when the draft GEIS will be publicly available; the desire for more meeting locations, time, and advance notice; the difference between a public meeting and a hearing; concern over the level of security for public meetings; the level of NRC's evaluation, concurrence, and availability of the March 5, 2013, Scoping Summary Report; the continued licensing of nuclear plants; concern of indefinite storage option and temporary storage rule; what is the life of a nuclear plant; how is the NRC going to address the reactors that are moving to high-burnup with a large amount of fuel and different cladding materials; and concern of hardened on-site storage (HOSS) in dry casks.

The transcript for this meeting is available in the NRC's Agencywide Document Management and Access System (ADAMS) under Accession No. ML13122A097. Furthermore, the Scoping Summary Report, which was discussed during this meeting, can be found under Accession No. ML13060A128. The ADAMS Public Electronic Reading Room is accessible at <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS, or who encounter problems in accessing documents located in ADAMS, should contact the NRC's Public Document Room reference staff at 1-800-397-4209, or via email at pdr.resource@nrc.gov. For convenience, the transcript is also available on the Waste Confidence Directorate's website at <http://www.nrc.gov/waste/spent-fuel-storage/wcd/public-involve.html>.

Due to the upcoming move of the Waste Confidence staff to another building in mid-May, the next public teleconference to discuss the status of the Waste Confidence GEIS and Rulemaking is scheduled for Wednesday, May 29, 2013, at the same time, 1:30 – 2:30 P.M. EDT, with the same call-in number. Meeting details are also available on the Waste Confidence Directorate's website at <http://www.nrc.gov/public-involve/public-meetings/index.cfm>.
