Hi Lori

The NRC is replacing all of the KI distributed to PA. Those with the lot number TU902B were sent to PA and were then apparently distributed to the public. Does this mean that you are not replacing the tablets that were distributed to the public? Will they be purchasing their own in the future? Will the State only maintain stockpiles? We made the assumption during our estimation of the number of tablets for PA that you would be replenishing those that had been distributed to the public and other facilities as well as those held back into State stockpiles. If that is not the case, that is certainly fine with us. Please let us know if we have misunderstood.

Thanks so much,

Trish

Good afternoon Ms. Stang,

Per your initial email dated 3/8/13, the PA DOH no longer has an inventory of lot number TU902B expiring in December 2014; it was previously distributed. The current inventory includes the following lot numbers:

Lot #	Expiration
TU903A	2/2015
TU904A	6/2015

Please contact me at 717.346.0640 if you need further information.

Regards,
Lori Gutierrez

Hello,

The NRC is preparing to replenish expiring stockpiles of KI tablets. According to our records your State has 681,600 (65mg) tablets with lot numbers TU902B expiring in December 2014. The NRC will replace the expiring stockpiles during fiscal year 2014. If your State wishes to participate in the NRC KI tablet replenishment, please respond with the delivery address, point of contact (including phone number) and any special delivery requests you have no later than May 31, 2013. Please note these tablets will not be shipped until 2014 to ensure timely replacement of your States expiring KI stockpiles. We will notify you prior to shipment of the tablets to enable you to make any preparations necessary for receipt of the shipment.

Thank you so much for your prompt attention to this matter. I look forward to your response. Please let me know if you have any questions.

Thank you,
Annette Stang
