Subject: RE: Formula for KI distribution

Hi Bill,

We are basing our numbers on previous request from CA back in 2009 (Ben Tong/Michele Skiermont). I have copies of e-mail traffic in my files. This is what we sent CA below:

- 203,300 (Lot# TU902B) expires 12/2014, delivered 8/18/09 – delivered to Attn: Tracy Vardas, 2191 Johnson Ave., San Luis Obispo, CA
- 260,200 (Lot#TU902C) expires 12/2014, delivered 12/14/09 – delivered to Attn: Kerri Fogh, 2228 Ritchey St., Santa Ana, CA
- 1,097,840 (Lot#TU905A) expires 7/2105, delivered 12/14/09 – delivered to Attn: Kerri Fogh, 2228 Ritchey St., Santa Ana, CA

We are currently working on a contract to replace 2014 tablets.

Please let me know if you need anything else.

Thank you,
Annette

Subject: Formula for KI distribution

Annette

We have had an inquiry from our IPC partners as to how the NRC determined the number of tablets to distribute to the states. Specifically, around SONGS. I suspect it was updated census numbers multiplied by two days dosage or something along those lines. Please let us know the NRC's methodology for the number of tablets provided.

Thank you

Subject: KI

Bill, as I may have mentioned yesterday, the IPC is looking at their KI allotment from the NRC and may request more even though they know they will probably not get it. A question came up regarding what formula the NRC originally used to determine how much KI the NRC was going to provide to each site. So, can you ask Annette what formula they used? Sara is curious to know.

Thanks much. Lynne
