MAGNASTOR AMD. 3 TECHNICAL SPECIFICATIONS

SUMMARY

NRC Participants: Michele Sampson; Craig Hrabal; Zhian Li
NAC International Participants: Wren Fowler; Tony Patko

Teleconference to discuss error identified in the proposed rule package for MAGNATRAN CoC No. 1031, Amendment 3, ML12227A900. NAC International identified they would provide an additional draft table for undamaged fuel that would correct the typos in the original Table B2-4, "Bounding PWR Fuel Assembly Loading Criteria -Enrichment/Soluble Boron Limits," which has enrichment limits for undamaged fuel. Damaged fuel would be accounted for by a new separate Tech Spec table using the results from Table 6.7.8-10, "PWR Damaged Fuel Assembly Allowable Loading Without Inserts (Enrichment/Soluble Boron Limits)" in the FSAR.

Continue on Page 2

ACTION REQUIRED (IF ANY)

The corrected information will be submitted by NAC International as a comment to the proposed rule. Staff will review the information and correct the technical specifications in the final rule issuing Amendment 3.
