Bob,

Unit 1 and Unit 2 RPV's were ordered from Rotterdam Dockyard at the same time – November 23, 1970. The Unit 1 RPV was purchased under PO 546-CVO-116641-BP while the PO for Unit 2 ended in "42-BP." The PO's each describe Qty 1 – 173" inside diameter reactor vessel together with all equipment and documents as described to be manufactured in accordance with Westinghouse specification 67413, Revision 2 and specification 677027, Revision 2 and dated 10-21-1969.

They were originally spaced out by 6 months for shipment ex-works, with Unit 1 requested no later than December 15, 1973 and Unit 2's vessel requested no later than June 1, 1974. The delivery date shifted a little bit with subsequent change notices and the respective delivery dates on site for the U1 and U2 vessels ended up as follows:

Unit 1 – December 9, 1974
Unit 2 – December 17, 1974

Let me know if this doesn't answer the question, requires further clarification of the details presented, or requires further refinement.

Kindly,
Russ.

The lady that usually helps me out with WH questions is out today. We'll try to get an answer for you early next week on the purchase date for the Unit 1 RPV.

Russ...please ask Robin (WH)
