Subject: RE: Accomplishments for March

Stacey,

EVIB provided our input to the Safety Evaluation of the Vermont Yankee Core Plate Hold-Down Bolt Inspection and Analysis. EVIB also concurred on the final SE, for which EMCB had the lead. This was a first-of-a kind review of a plant-specific core plate hold-down bolt analysis submitted in fulfillment of a license renewal commitment. (Several BWR's made similar commitments). The SE was issued to the licensee on March 28, 2012.

Subject: Accomplishments for March

EVIBers,

Please send me your accomplishments for the month of March.

Thanks,
Stacey
