Ladies and Gentlemen:

Duke Energy Florida, Inc. (DEF) hereby submits our response to the Nuclear Regulatory Commission's (NRC) request for additional information identified in Reference 1.

Enclosure 1 to this letter contains DEF's response. That Enclosure also identifies changes that will be made in a future revision of the Levy Nuclear Plant Units 1 and 2 COL application.

This submittal also includes the Duke Energy Quality Assurance Program Description (QAPD) Revision 8 which is applicable to LNP (see Enclosure 2). The changes made in Revision 7 of the QAPD are primarily related to recent nuclear organizational changes, and the changes made in Revision 8 of the QAPD are editorial.

NRC

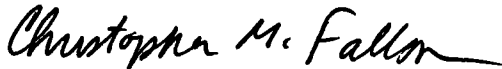

In a public teleconference held on April 4, 2013 (Reference 3), the NRC identified inconsistencies within information related to the Levy Emergency Plan contained in our submittal of February 21, 2013 (Reference 2). Since these inconsistencies are related to the organizational descriptions for Duke Energy and the Levy Nuclear Plant discussed in this RAI response, DEF is submitting the corrections of these inconsistencies as a part of the changes to the Levy COL application identified in Enclosure 1 of this submittal.

If you have any further questions, or need additional information, please contact Bob Kitchen at (704) 382-4046, or me at (704) 382-9248.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on May 6, 2013.

Sincerely,

Christopher M. Fallon
Vice President
Nuclear Development
