SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE

Road Builders Corporation has informed the Nuclear Regulatory Commission (NRC) of its decision to terminate NRC radioactive materials license number 53-29378-01. In support of such request, Road Builders Corporation has submitted NRC Form 314 dated April 6, 2013. The license termination request stated that all activities authorized by this license have ceased, and all radioactive material possessed by the licensee under this license have been transferred to a licensed entity.

The NRC staff has reviewed the supporting documentation to your NRC Form 314. The leak test result submitted indicated that there was no evidence of leakage of radioactive material from the sealed source that was in your possession. Based on this information and a review of your historical file, the staff concluded that all licensable radioactive material has been removed from your facility located at 2836 Awaawaloa Street, Honolulu, Hawaii. This facility is suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." No further remediation with respect to NRC regulated material is required.

Please find enclosed amendment number 02 to license number 53-29378-01 authorizing your license termination. An environmental assessment for this action is not required since this licensing action is categorically excluded under 10 CFR 51.22(c)(14)(viii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.
