Subject: RE: NRC Acceptance Review on AUC Reno Creek Project

Chad:

Thanks for your email. I am copying Phil, Leland and Dan with my reply so that we may make sure of our answer to you. In any event, you'll have all of that information for your acceptance review completion.

I am out of the office both Wednesday and Thursday, but we'd be available on Friday, if that would work.

Thanks.

Jim Viellenave

Subject: NRC Acceptance Review on AUC Reno Creek Project

Mr. Viellenave,

As we approach the end of our acceptance review, we have identified a couple instances where information may be either missing or located elsewhere in the application. We would like to arrange a call with you to determine whether or not the information is in the application. The specific information that we seek includes: (1) Addendum 2.7-E (Hydrogeologic Integrity Test Report), (2) Attachment I to Addendum 4-B (UIC 98-092 Permit), (3) public and occupational health information, and (4) clarification for areas of disturbance in the cultural resources section. If this application is missing this information, we request that it be submitted ASAP so we can include the information with the AUC application in ADAMS.

Please let me know if there is an opportunity to arrange call sometime tomorrow (5/8) or another time this week?

Thanks,

Chad Glenn
