Subject: Reportable spill in K wellfield, DEQ permit 633, NRC Source License SUA-1548
Date: Saturday, May 04, 2013 3:49:42 PM

This email is to document that verbal notification was given to your office on 5-4-13 of a reportable release on Permit 633, NRC Source Material License SUA-1548. The release happened on Friday, 5-3-13. The data reported was as follows;

- Location: Wellfield K, trunk line near header house K-6.
- Fluid release estimated at 55,000 gallons of injection fluid. Uranium content approximately 2 ppm
- Cause was a rupture type failure with main trunk line delivering IC solution to header houses in the K-South wellfield. A vacuum truck was dispatched and recovered approximately 16,800 gallons of fluid released on the surface.

The WDEQ-WQD will be contacted and a report will be filed with the WQD spill database.

A written notification will be sent out on or before Friday, May 10, 2013.

Please reply or call if more information is needed
