Subject: Supplemental Inspection Readiness

In Reference 2 the NRC informed Fermi 2 that the NRC will conduct a supplemental inspection using Inspection Procedure 95001, "Supplemental Inspection for One or Two White Inputs in a Strategic Performance Area" as a result of exceeding the Green-to-White performance indicator threshold for the "Unplanned Scrams per 7000 Critical Hours."

The purpose of this letter is to inform the NRC of Fermi 2's readiness for the NRC to conduct the subject inspection. Based on discussions with the NRC staff, Fermi 2 anticipates this inspection to begin on or about June 10<sup>th</sup>, 2013.

No new commitments are being made in this submittal.
