Hi Pete,  
It doesn't look to me like RG 1.155 has been directly updated, but there is a Draft Guide (DG) DG-1294, "Preoperational Testing of On-Site Electric Power Systems to Verify Proper Load Group Assignment, Electrical Separation, and Redundancy," dated November 2012. It's ADAMS [ML12228A589](#). This may be some help. If not, let me know and I'll check further.  
Joelle

Thank you, Joelle. I hate to punish you by asking another question, but do you know where I could find something on plans to revise RG 1.155, if any, or verify that there are no plans to revise it. I heard someone say it was revised, but I cannot locate anything about that on the NRC site using the search tools.

Regards,  
Pete

Number\_Title: 8.4 STATION BLACKOUT

comments: I was unable to determine whether or not this section will be modified specifically for the mPower design. Can you steer me toward that answer please?

organization: B&W mPower

Hello Pete,

You can determine the mPower applicability of each SRP/BTP section by looking at the mPower Design-Specific Review Standard Scope and Safety Matrix (NRC ADAMS Accession No. ML13088A252). For section 8.4, a new DSRS section has been issued (ADAMS ML12269A015). Links to those documents follow:

mPower Design-Specific Review Standard Scope and Safety Matrix
