SSG Calvillo,

We received your request dated February 28, 2013 to add an area of use for IV infusion of Tc-99m Ceretec. To support this request, please address the following:

1. Confirm that all radioactive waste and spent syringes will be returned to the Nuclear Medicine Department for disposal. Alternatively you may identify a secure and posted area for storage of this material within the quiet room.
2. Confirm that radiation surveys will be conducted of this area following use.
3. Describe the areas of use located above and below the quiet room.
4. Indicate whether this use is considered a routine clinical use for Ceretec as described in the package insert or whether this is an investigational use. If this use is considered investigational, please describe how the requirements in 10 CFR 35.6 will be met.

You may submit this information to my attention either via facsimile to 610-337-5269 or you may submit a signed pdf of the response via email. If we do not receive a response within 30 days, we will assume that you no longer require this addition and will void your request. If you have any questions, please feel free to call me at 610-337-5169.
