Auto forwarded by a Rule

Hello

Here is my new 2.208 petition for rule making

All public meetings shall be held on public property ie town halls, conference room etc. So the utility can have no say on who can attend or restrict access to public of there choice for no reason.It is not a public meeting when the utilities can control attendees.

FPL did that to me at the last NRC Public meeting i was meet at the door by the head of corporate security and a local sheriff. I was told i was not allowed to enter the meeting and when I asked why there answer was because i said so (corporate security) its our property i dont care if it is a public meeting or not. Then the sheriff told me to leave and FPL put a trespassing warrant against me.
