**General Comment**

To Whom This May Concern,

I am writing in objection to insitu mining. Due to the fact that there are many cases of excursions and leaks that lead to dangerous minerals and chemicals to leave "controlled" areas. Mining for uranium should be done only in cases where it is needed, not allowing other countries to pollute our water and not have to pay the extravagant costs of cleanup. When will our leaders and decision makers change? There are problems popping up all over the USA because you allow these things to happen. Washington, just to name one!

Soon, you or your children will be drinking the end results. I am asking that you stop, I have yet to see a good way to mine for uranium that does not have hazarous health effects on humans. Your smart, figure something else out. That we would support.

Thank you for your time, Jerri
