Docket No. 50-443

SBK-L-13097

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555-0001

Seabrook Station
Correction to 2011 Fitness-For-Duty Program Performance Data Report

Reference: SBK-L-12031, Annual Fitness-For-Duty Program Performance Data Report, dated February 15, 2012

NextEra Energy Seabrook, LLC identified that a refusal to test was not included in the referenced report. This submittal corrects the Fitness-for-Duty Program Performance Data. The 10 CFR Part 26 Annual Fatigue Results information for 2011 does not require correction and is not included in this submittal.

Should you have any questions regarding the enclosed report, please contact me at (603) 773-7745.

Sincerely,

NextEra Energy Seabrook, LLC

Contractors	9	1	1	0	0	3	3	
Total	9	1	1	0	0	3	3	17

Management Actions

For the reporting period of 2011, nineteen (19) individuals were denied unescorted access authorization after testing positive for drugs or alcohol, refusing to test or subversion attempts. By test type seventeen (17) pre-access tests were positive, subverted or refusal to test, one random test was a refusal to test, and one follow-up test was positive. Of the seventeen pre-access tests, there were two refusals to test, and two subversion attempts. All nineteen individuals were denied access. Five of these denials were permanent denials in the industry.

Pre-Access Positive Tests

Eleven (11) Initial, four (4) Update, and one (1) Reinstate <365 day contractor employees tested positive for drugs or alcohol. They were all denied access.

Random Positive Tests

One (1) contractor employee refused to test after providing a specimen that had no temperature, and he decided to leave before we collected a new sample observed. The individual was permanently denied.

Follow-Up Positive Tests

One (1) contractor employee tested positive for alcohol, and the individual was denied access.

Additional Comments

1. There were two subversion attempts during the 2011 reporting period.
2. For the 2011 reporting period, all blind specimens sent to the HHS-certified lab yielded expected results.
3. Three Call In tests were conducted for alcohol only, along with two for cause tests that were for odor of alcohol and only the alcohol portion was tested. These are not in the numbers on the previous page due to the fact that they were alcohol only, as permitted in 26.77(b)(1).

Reportable Events

Seabrook Station had no reportable event as defined in 10 CFR Part 26.719 during this reporting period.
