**Subject:** [External] Regarding Amendment Request for NRC License No. 18-19750-02E

Good Morning Mr. LaMarre,

In the attached letter dated April 2, 2013 from UTC Fire & Security a change of address for the official mailing address and distribution center to 129 N. Main St, Pittsfield, ME 04967 is requested. Nuclear Regulatory Commission (NRC) license reviewers have reviewed materials license number 18-19750-02E, Amendment 14 (attached for reference) dated July 13, 2010 and they have concluded that the information UTC Fire & Security requested to be updated has already been updated; therefore no amendment is necessary at this time and no further action will be taken by the NRC at this time.

Please let me know if you have any questions.

Thank you,

Katie Wagner  
General Engineer  
U.S. Nuclear Regulatory Commission  
(301) 415.6202
