SUBJECT: RIVER BEND STATION – NOTIFICATION OF TI-186 INSPECTION
(NRC INSPECTION REPORT 05000458/2013406) AND REQUEST FOR
INFORMATION

Dear Mr. Olson:

From June 3 to June 5, 2013, inspectors from the Nuclear Regulatory Commission's (NRC) Region IV office will perform the Temporary Instruction (TI)-186, "Inspection of Procedures and Processes for Responding to Potential Aircraft Threats." In order to minimize the impact to your onsite resources and to ensure a productive inspection, we have enclosed a request for documents needed for this inspection. It is important that all of these documents are up to date and complete in order to minimize the number of additional documents requested during the preparation and/or the onsite portions of the inspection. Also, in order to demonstrate compliance with TI-186, we ask that you have the necessary staff members available to the inspection team to assist in any plant walk-throughs, interviews, and simulator demonstrations.

We have discussed the schedule for these inspection activities with your staff and understand that our regulatory contact for this inspection will be Mr. Bill Fountain of your licensing organization. If there are any questions about this inspection or the material requested, please contact Chris Steely, lead inspector, at (817) 200-1432 (Chris.Steely@nrc.gov) or Duane Strickland at (817) 200-1570 (Duane.Strickland@nrc.gov).
