Scott Elkins, Chief
Reactors Systems Analysis Branch
Division of Systems Analysis
Office of Nuclear Regulatory Research

FROM: Benjamin Beasley, Chief **/RA/**
Operating Experience and Generic Issues Branch
Division of Risk Analysis
Office of Nuclear Regulatory Research

SUBJECT: UPDATE OF THE GENERIC ISSUE MANAGEMENT CONTROL
SYSTEM REPORT (FY 2013, Q3)

The Office of Nuclear Regulatory Research (RES) requests information on the status of the active Generic Issues (GIs) managed by your branch. This information will be used to develop the Generic Issue Management Control System third quarter report for fiscal year (FY) 2013 and the annual Commission Paper (SECY) on Summary of Activities Related to the Generic Issues Program. The third quarter reporting period extends to June 1, 2013, therefore, updates should address status as of that date and include any necessary changes to the status presented in the FY 2013 second quarter report (ML13093A296). Arthur Cunanan will contact the following staff members, who are responsible for each GI, to make arrangements for obtaining updated information:

Steven Jones (GI-189 task manager)
Stewart Bailey (GI-191 task manager)
William Krotiuk (GI-193 task manager)
Clifford Munson (GI-199 task manager)
Christopher Cook (GI-204 task manager)

CONTACT: Arthur Cunanan, RES/DRA
301-251-7457

This information will be available to the public and other Government agencies. Therefore, you and your staff should provide only publicly releasable information. To permit timely issuance of the update, our office would appreciate receiving updates on, or before, June 20, 2013.
