Attn: Spyros Traiforos, Program Manager, RTR **Operating License R-116 Docket 50-326**

Subject: Emergency Plan Changes incorporated under 10 CFR 50.54(q)

We wish to submit several changes to our Emergency Plan that are needed to account for changes that have been made external to the reactor operation and administration and so have only recently been recognized. We believe that these changes do not significantly impact the response actions to radiological emergencies at this facility and so can be included under the 10CFR 50.54(q) permit and other NRC guidance. The attached document details these changes and our analysis of their potential impact.

We regret that these have not been reported earlier and will endeavor to assure that any subsequent modifications as a result of budgetary or other changes are recognized more quickly as they occur. These changes and the review have received approval from the UCI Reactor Operations Committee.

I declare under penalty of perjury that the foregoing and the attached are true and correct to my knowledge.

Executed on May 23rd, 2013.

A handwritten signature in black ink that reads 'G. E. Miller'.
