Thanks, Ganesh.

I'm going to forward my input to Pani. I anticipate that Pani and I will need to meet to figure out how we are going to integrate my input into his SE.

Jeff

Subject: Peer Review of SE Input for Vermont Yankee Core Plate Bolt Analysis (ME6248)

Ganesh,

As discussed yesterday, please peer review (technical only) my SE input for Vermont Yankee. Use TAC ME6248. Note that it is not a complete SE because Pani has the lead on the SE. He can integrate my inputs into the structure of his SE.

If you can give me comments by the end of the week that would be fine.

Pat, I copied you so if you have time to review your comments would also be appreciated.

Thanks,

B/22
