Thanks Brady. I ran into Steve Unwin this morning and gave him my complements on your work.

Greg,

I wanted to thank you for all your help and comments on that report. You really improved the quality and I very much appreciate it.

Thanks,

Brady

Subject: status of NUREG/CR

All,
Jay Collins completed his review of the draft NUREG/CR. Congratulations, he was very impressed! There should be relatively minor changes and revisions expected. I will be at a conference next week but will try to find time for compiling the comments and sending back to you by mid to later part of the week. I will probably need the FTP site. There is a good chance that this report will be sent to the Advisory Committee for Reactor Safety for review. They have been placing emphasis on justification of major assumptions and addressing of uncertainties and sensitivities. So aside from editorial comments there will likely be some need to more explicitly call out these criteria. Thanks again for your good work.

Greg
