Combustion Engineering, Inc.  
 ATTN: Mr. F. M. Stern  
 Director, NSSS Projects  
 Combustion Division  
 Windsor, Connecticut 06095

Gentlemen:

In your letter of November 5, 1973, in reference to our letter of October 2, 1973, you stated that Combustion Engineering, Inc. (CE) intends to provide the results of ECCS analyses for one of the nuclear plants licensed for construction that utilize a CE 3410 Mwt nuclear steam supply system as evidence of the adequacy of the ECCS for these plants. You further stated that CE intends to submit this analysis within six months after approval of your new ECCS evaluation model, but not later than six months prior to the submittal of the FSAR for any of the 3410 Mwt plants.

This plan of action is acceptable to us. Whether you submit the analysis as a topical report, as we suggested in our letter of October 2, 1973, or as an amendment to the application for one of the 3410 Mwt plants, the applications for each 3410 Mwt plant should be amended to include the appropriate reference, a description of any differences from the ECCS design used in the referenced analysis, and any additional analyses pertaining to the particular plant.

Sincerely,

Original Signed by  
 R. C. DeYoung

R. C. DeYoung, Assistant Director  
 for Light Water Reactors Group 1  
 Directorate of Licensing
