Mr. H. R. Denton
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket No. 50-362
Amendment Application No. 1
San Onofre Nuclear Generating Station
Unit 3

Enclosed are three executed and forty conformed copies of Amendment Application No. 1 to Operating License NPF-15 for San Onofre Nuclear Generating Station, Unit 3. Amendment Application No. 1 consists of Proposed Change NPF-15-2 to Facility Operating License NPF-15, Technical Specifications incorporated as Appendix A.

Proposed Change NPF-15-2 is a request to revise Technical Specification 3.9.8.2, REFUELING OPERATIONS LOW WATER LEVEL to allow both shutdown cooling trains to be removed from operation to facilitate fuel movement and core alterations in the vicinity of the reactor pressure vessel hot legs. On November 19, 1982, the NRC granted early approval of Proposed Change NPF-15-2, as requested by Southern California Edison Company (SCE), to facilitate completion of Unit 3 core loading.

It is requested that Amendment Application No. 1 be reviewed promptly and appropriate action taken. Direct distribution of Amendment Application No. 1 to Facility Operating License NPF-15 will be made in accordance with the service list provided in SCE's letter of August 2, 1982 to the Commission. An affidavit attesting to the fact that distribution has been completed will be submitted within ten days of amendment docketing.

The proposed change contained in Amendment Application No. 1 is considered to constitute a Class II amendment based on the determination that this change has no safety or environmental significance. Accordingly, enclosed is Southern California Edison Company's check in the amount of \$1,200.00 as required by 10 CFR 170.22.

Very truly yours,

Robert Dietch
