Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
Fee for NRC Review of Reload Licensing Reports
San Onofre Nuclear Generating Station (SONGS)
Units 2 and 3

SCE's letters of September 28 and November 7, 1984 transmitted the Reload Analysis Report and Statistical Combination of Uncertainties Report for SONGS Units 2 and 3 for Cycle 2. NRC review of the reports was requested to facilitate approval of the associated Technical Specification Changes required for Cycle 2 operation. Application fees of \$150.00 were remitted with each license amendment application containing the Technical Specification Changes for Cycle 2 operation. SCE assumed the costs for the review of these reports would be billed to the accounts of the associated Technical Specification changes. Nevertheless, we have remitted an application fee of \$150.00 with this letter in response to your letter dated December 20, 1984 requesting a separate fee for review of the subject reports. SCE understands that any additional costs for the review of these reports will be billed in accordance with 10 CFR 170.12(c) and 170.21.

If you have any questions or comments, please let me know.

Very truly yours,

cc: H. Rood, NRC Project Manager
F. R. Huey, NRC Senior Resident Inspector
