

JUN 11 1981

MEMORANDUM FOR: The Atomic Safety and Licensing Board for San Onofre Nuclear  
Generating Station, Units 2 and 3

FROM: Darrell G. Eisenhut, Director, Division of Licensing, NRR

SUBJECT: BOARD NOTIFICATION - EMERGENCY PLANNING (BN 81-08)

The enclosed letter addresses NRC staff criteria for the consideration of earthquakes in emergency planning. This information is being forwarded to the San Onofre 2 and 3 Licensing Board because it relates to a legal issue that the Board has stated (see Prehearing Conference Order of May 8, 1981) should be resolved before the hearing.

Darrell G. Eisenhut, Director  
Division of Licensing  
Office of Nuclear Reactor Regulation

Enclosure:  
Ltr. to Southern California  
Edison Company, dtd. 5/13/81

P. O. Box 800  
Rosemead, California, 91770

Mr. D. W. Gilman  
Vice President - Power Supply  
San Diego Gas & Electric Company  
101 Ash Street  
P. O. Box 1831  
San Diego, California 92112

Dear Gentlemen:

SUBJECT: CLARIFICATION OF STAFF LETTER OF DECEMBER 17, 1980 REGARDING EFFECT OF EARTHQUAKES ON EMERGENCY RESPONSES AT SAN ONOFRE GENERATING STATION.

This letter is to provide clarification of the subject staff request for additional information. The intent of that request is to assure that adequate consideration has been given to the complicating factors which might be caused by earthquakes in the development of the emergency plans for your facility. We believe that planning for that eventuality should be part of your emergency plan in view of the relatively high frequency of severe earthquakes in California. Accordingly, as indicated in our December 17, 1980 letter, you are requested to evaluate the effects earthquakes would have on your emergency response capability and include these considerations in your emergency plan. For purposes of this evaluation, as a planning basis you may assume that the plant site experiences earthquake effects no more severe than the Safe Shutdown Earthquake. While you need not assume that a reactor accident occurs simultaneously with the earthquake event, you should include in your planning basis the consideration that the plant might have been adversely affected by the earthquake (e.g. through failures or degradations in non-seismically qualified systems and components) and may, therefore, be more prone to the potential for an incident that might result in off-site releases of radioactive material.

Specifically the following items should be considered in the evaluation of the effect of earthquakes on your emergency plan:

1. Ability to transport necessary personnel to the plant to cope with degraded modes of plant operation.
2. Communication between the plant and outside agencies.
3. Ability to obtain damage estimates, both to the plant and to transportation/communication facilities off-site. This information should be available to factor into the decision making process, including recommendations to offsite authorities for protective actions after an earthquake.

Dupe of 8107090 552

Mr. Robert Diller:

- 2 -

4. Develop a range of recommendations to off site authorities that takes into account various degrees and locations of damage to the plant environs.

Sincerely

Robert L. Tedesco, Assistant Director  
for Licensing  
Division of Licensing
