Gentlemen:

Subject: Docket No. 50-361
Containment Spray Event
San Onofre Nuclear Generating Station
Unit 2

Reference: February 5, 1991 letter, L. E. Kokajko (NRC) to
Harold B. Ray (SCE) and G. D. Cotton (SDG&E),
Subject: Inadvertent Containment Spray Events at
Commercial Nuclear Power Plants

In the referenced letter the NRC requested Southern California Edison (SCE) to submit the details and results of our review of industry experience, which is part of SCE's continuing evaluation of the November 20, 1990, containment spray event at San Onofre Unit 2. The NRC requested the submittal, or the schedule to provide the response, within 60 days of the date of the referenced letter.

As requested, SCE is conducting a more detailed review focused not only on previous containment spray events, but also on industry experience and NRC generic communications that may be relevant. This comprehensive review will require more than 60 days to complete. Accordingly, the schedule for submittal of the details and results of our review is June 17, 1991.

If you would like any additional information, please let me know.

Very truly yours,

cc: J. B. Martin, Regional Administrator, NRC Region V
C. W. Caldwell, NRC Senior Resident Inspector, Units 1, 2,
and 3
