Gentlemen:

**Subject: Docket No. 50-361 and 50-362
Individual Plant Examination of External Events (IPEEE)
San Onofre Nuclear Generating Station
Units 2 and 3**

**Reference: R. M. Rosenblum to Document Control Desk, December 23, 1991,
"Schedules for Completing the Individual Plant Examination of
External Events (IPEEE), Generic Letter 88-20, Supplement 4," San
Onofre Nuclear Generating Station, Units 1, 2, and 3.**

On December 23, 1991, Southern California Edison (SCE) submitted for NRC approval our proposed schedule for completing the IPEEE studies for San Onofre Units 2 and 3 by June 28, 1996 (Reference). Due to the planned permanent shutdown of San Onofre Unit 1, SCE will be able to dedicate more resources to the Units 2 and 3 IPEEE, and advance its completion by about one year. Therefore, SCE requests NRC to approve a June 30, 1995, submittal date for the Units 2 and 3 IPEEE analysis.

If you have questions or require any further information, please let me know.

Very truly yours,
