50-362-OL

San Onofre Nuclear Generating Station Units 2 & 3

Gentlemen:

I am strongly in favor of the licensing of referenced Units 2 and 3!

Nuclear power does not result in air and water pollution.

Nuclear power is a relatively cheap and competitive source of power.

Nuclear power is not subject to the whims of OPEC represented countries or other foreign oil producing countries.

Means for the handling of spent uranium fuel are adequate and the state of this art is rapidly improving.

The risks of a nuclear plant disaster are significantly less than every day risks that are accepted by the public.

More nuclear energy units will place this country in a better economic position related to foreign nations.

Delays in subject licensing are costing all of us.

Pray, let us get on with it and approve the licensing of subject Station Units 2 & 3.

Sincerely,

Joseph D. Brunner
