### Rosemary...

Rosemary (*Rosmarinus officinalis*) is the herb of memory which it is said to restore, and it also brings good luck, prevents witchcraft, disinfects the air, and has been used traditionally at weddings and funerals.

Green or dried, use leaves sparingly on chicken; in gravy with lamb; in soups, stuffings, sauces, dressings, in jelly and as tea.

Rosemary oil is used in medicine, perfumes, hair preparations, bath soaps and mouthwashes.

Dear Persons U.S. —  
Regulatory Commission

I am writing to vehemently protest the San Onofre power plant disasters and to beg you not to license it.

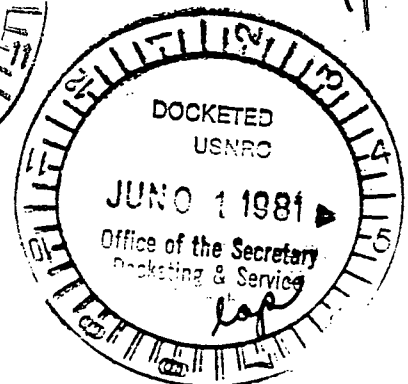

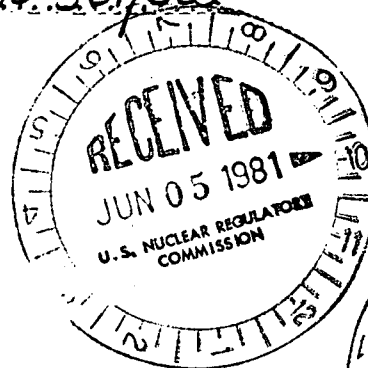

The fraud of this unsafe and horrendously expensive project must finally be severed.

Thank you -

James Vahjen
