Attention: Document Control Desk
Washington, D.C. 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

Enclosed are Amendment Application No. 43 to Facility Operating License NPF-10 and Amendment Application No. 29 to Facility Operating License NPF-15 for San Onofre Nuclear Generating Station (SONGS) Units 2 and 3, respectively.

Amendment Application No. 43 for Unit 2 and No. 29 for Unit 3 consist of Proposed Change NPF-10/15-248 (PCN-248). PCN-248 is a request to revise Technical Specification 3/4.3.1, "Reactor Protective Instrumentation." The proposed change would increase the interval for surveillance tests which verify the isolation characteristics of isolation amplifiers and optical isolators used to maintain electrical separation between core protection calculator/control element assembly calculator channels, from 18 months to "refueling interval," to support nominal 24 month fuel cycle operation.

Pursuant to 10 CFR 170.12, the required amendment application fee of \$150 is enclosed.

If you have any questions regarding this amendment application, please call me.

Very truly yours,

Kenneth P. Baskin
