U. S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, D.C. 20555

Gentlemen:

Subject: Proposed Technical Specifications Change NPF-10/15-155
Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

Southern California Edison Company (SCE) anticipates that the subject proposed Technical Specifications change previously submitted to the NRC on April 27, 1984 is soon to be approved.

Anticipating approval, SCE recently reviewed the proposed change and discovered that an editorially incorrect version of the proposed change had been submitted inadvertently. Specifically, Attachments A and B of the version submitted had omitted action statement time limits and had listed some valve numbers incorrectly.

Accordingly, corrected Attachments A and B for the proposed change are enclosed. SCE requests that these corrections be incorporated when the license amendment is issued.

Should you have any questions regarding this information, please call me.

Very truly yours,

M. O. Medford
