Gentlemen:

Subject: Docket No. 50-361
Amendment Application No. 63
San Onofre Nuclear Generating Station
Unit 2

Enclosed is Amendment Application No. 63 to Facility Operating License NPF-10 for San Onofre Nuclear Generating Station, Unit 2. Amendment Application No. 63 for Unit 2 consists of Proposed Technical Specification Change NPF-10-278 (PCN-278). PCN-278 is a request to revise Technical Specifications 3/4.4.8.1, "Pressure-Temperature Limits," 3.4.1.4.1, "Cold Shutdown-Loops Filled," 3.4.1.3, "Hot Shutdown," 3.4.8.3.1, "Overpressure Protection System, RCS Temperature $<235^{\circ}\text{F}$," and 3.4.8.3.2, "Overpressure Protection System, RCS Temperature $>235^{\circ}\text{F}$." The proposed change will revise the Reactor Coolant System Pressure-Temperature limit curves, LTOP temperatures, and associated bases to be effective up to 10 effective full power years of operation.

The current Pressure-Temperature (P-T) limits will expire at 423 effective full power days into Cycle 4 which is expected to occur in late March 1989. Accordingly, SCE requests expeditious review and approval of the proposed change prior to the expiration of the current P-T limits to support continued operation of Unit 2.

Pursuant to 10 CFR 170.12, the required amendment application fee of \$150 is enclosed.

If you have any questions regarding this amendment application, please call me.

Very truly yours,

Enclosures
