Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
Amendment Applications 64, 65 and 50, 51
San Onofre Nuclear Generating Station
Units 2 and 3
Request for Additional Information
TAC Nos. 71794, 71795, 71603 and 71604

- References:
1. SCE to NRC letter, dated December 30, 1988, regarding Amendment Application 64 and 50, PCN 266
 2. SCE to NRC letter, dated December 19, 1988, regarding Amendment Application 65 and 51, PCN 267
 3. NRC to SCE letter, dated June 26, 1989, regarding request for additional information

By Reference 3, received July 5, 1989, the NRC requested additional information regarding Southern California Edison's (SCE) Proposed Change Notices (PCNs) 266 and 267. These PCNs request extension of the current 18 month surveillance requirement associated with the containment area and high range monitors to a "refueling interval," nominally 24 months. These surveillance tests require that each containment purge isolation area monitor and containment high range monitor be demonstrated operable by performance of a channel calibration.

Additional time is needed to respond to this request. Therefore, SCE will provide the requested information by September 4, 1989.

If you have any questions regarding this additional information, please call me.

Very truly yours,

*Acc
