Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
Emergency Operating Instructions Update
San Onofre Nuclear Generating Station
Units 2 and 3

The purpose of this letter is to inform the NRC that Southern California Edison is in the process of implementing emergency operating instructions (EOIs) that are based on Submittal 3 of CEN-152, Rev. 3, "Combustion Engineering Emergency Procedure Guidelines" at San Onofre Units 2 and 3.

Southern California Edison has utilized the efforts of Combustion Engineering for the development of EOIs for San Onofre Units 2 and 3 through CEN-152. This document provides generic guidance for all CE plants and must be converted to plant specific guidance during the generation of EOIs. CEN-152 has undergone several revisions and NRC approval cycles following its initial release as indicated below:

<u>Date Submitted</u>	<u>NRC SER Issued</u>
Rev. 0, June 1981	July 29, 1983
Rev. 1, November 1982	April 16, 1985
Rev. 2, May 1984	December 2, 1985
Rev. 3, July 1985 (Submittal 1)	(None Issued)
April 1986 (Submittal 2)	November 5, 1986
September 1987 (Submittal 3)	(Pending)

The original EOIs were based on CEN-152, Rev. 1, and were implemented on February 26, 1985. When CEN-152, Rev. 2, was prepared, SCE began revising the affected EOIs for issue following NRC approval of Rev. 2. CEN-152, Rev. 2, was approved on December 2, 1985 and the revised San Onofre Units 2 and 3 EOIs issued on December 24, 1985.

Revision 3 to CEN-152 was unusual in that there were three separate submittals of this revision with minor enhancements made in each subsequent submittal. Because SCE works in close cooperation with both CE and the CE Owners Group, and due to the substantial effort involved in revising the EOIs, SCE chose to

June 21, 1988

prepare Revision 3 of the EOIs based on Submittal 3 of CEN-152, Rev. 3. (This was done to preclude two additional EOI revision cycles.) Revision 3 to the San Onofre Units 2 and 3 EOIs has been prepared and is currently undergoing verification and validation. Operator training on the new EOIs is scheduled to begin during August 1988 and implementation is scheduled for early October 1988.

This revision to the EOIs has been made to address several NRC concerns that were identified in the November 5, 1986 SER and provides operational enhancements over the current EOIs. If you have any questions or comments, please contact me.

Very truly yours,

cc: J. B. Martin, Regional Administrator, NRC Region V
F. R. Huey, NRC Senior Resident Inspector, San Onofre Units 1, 2 and 3
