Mr. Harold Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Denton:

The full Board of Directors of the Harbor Association of Industry and Commerce (HAIC) at their meeting on August 9th unanimously approved the enclosed resolution urging the licensing of Units 2 and 3 of the San Onofre Nuclear Generating Station.

Full operation of the units will save millions of barrels of oil each year, reduce dependence on foreign supplies and save rate paying consumers millions of dollars in their electric bills.

It is for these reasons and those stated in the resolution that we urge your prompt attention and timely approval of this vitally needed new energy project.

Sincerely,

  
Alfred J. Roberts  
President

#### **IMMEDIATE PAST PRESIDENT**

Hayden H. Jones, Jr.  
Union Oil Company of Calif.

WHEREAS, The Board of Directors of the Harbor Association of Industry and Commerce on May 7, 1981 unanimously approved the licensing and full operation of the Diablo Canyon nuclear power plant in recognition that adequate supplies of energy are critical to meeting those needs; and

WHEREAS, The Harbor Association of Industry and Commerce acknowledges that escalating energy prices, population expansion and pressure to conserve unpredictable supplies of foreign controlled oil will require increasing dependence on multiple energy sources such as solar, geothermal, wind, coal and nuclear; and

WHEREAS, The Harbor Association of Industry and Commerce further recognizes that nuclear energy is a most important element to insure the near future energy supplies of Southern California; and

WHEREAS, Regulatory delays in the siting and licensing or critical electric generating facilities are costly to business, industry and all other consumers, threaten a healthy and productive economy, and necessitate a greater dependence upon foreign oil supplies;

NOW, THEREFORE, BE IT RESOLVED, That the Harbor Association of Industry and Commerce urges:

1. The licensing of Units 2 and 3 of the San Onofre Nuclear Generating Station;
2. The continued development of other alternate energy sources such as solar, geothermal, wind and coal;
3. The continued commitment to energy conservation and proper energy management to maximize utilization of domestic energy sources and reduce waste.
