RE: SUPPORT FOR SAN ONOFRE NUCLEAR GENERATING STATION, UNITS 2 and 3

Dear Mr. Denton:

Fontana Paving, Inc., a privately held business, operates two asphalt plants and two rock plants in Corona, Riverside County and Fontana, San Bernardino County. Our rock and asphalt plants use a considerable amount of electrical energy. Through the assistance of the Southern California Edison Company, we are continually developing methods to reduce our electrical demand.

The cost for use of electrical power has been substantially increasing, and we do pass these cost increases on to our customers. The major dollar volume of our work is with public agencies; city, county, state and federal governments, who purchase our products either at our plants or at a contract price for asphalt paving materials in place. The consumers/taxpayers are the final recipients of these increased costs.

In order for us to have the available electric power for our operations, we urgently need the operation of the SAN ONOFRE NUCLEAR GENERATING STATION, UNITS 2 and 3.

Please give serious consideration to my remarks and I pray that you will proceed with the timely processing of the operation licenses for the SAN ONOFRE NUCLEAR GENERATING STATION, UNITS 2 and 3.

Sincerely yours,

FONTANA PAVING, INC.
