Director, Office of Nuclear Reactor Regulation
Attn: Richard C. DeYoung, Director
Division of Site Safety
and Environmental Analysis
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. DeYoung:

Subject: San Onofre Nuclear Generating Station
Units 2 and 3
Docket Nos. 50-361 and 50-362

In accordance with the July 6, 1978 approval of the Pre-operational Monitoring Program (PMP) for San Onofre, Units 2 & 3, the results of the PMP have been incorporated into the 1978 Annual Operating Report for Unit 1. Volume IV of the 1978 Annual Operating Report for San Onofre Nuclear Generating Station presents the Biological, Sedimentological, and Oceanographic Data Analyses. Copies of Volume IV are being sent to both the Office of Inspection and Enforcement, Region V, and the Division of Site Safety and Environmental Analysis as required by the Unit 1 Environmental Technical Specifications and the approval for the Preoperational Monitoring Program for Units 2 and 3.

Data collection for the PMP began in mid-1978 resulting in less than a full year of data. The amount of data collected was insufficient to assess seasonal cycles and certain statistical methods could not be properly applied. However the data are presented and discussed, within the appropriate limitations of the data set.
