Director, Office of Nuclear Reactor Regulation
Attention: Mr. George W. Knighton, Branch Chief
Licensing Branch No. 3
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

The NRC's letter of September 20, 1982 (Generic Letter No. 82-16) requested all licensees of power reactors to submit proposed Technical Specifications for the items applicable to their reactor. Item 2 requested the administrative section of the Technical Specifications be revised to require procedures that follow the NRC policy statement to limit overtime.

SCE's letter of December 7, 1982 responded to Generic Letter No. 82-16. The letter stated that San Onofre Unit 3 has incorporated the overtime requirements into the Technical Specifications and an amendment application was being prepared for Unit 2. In that overtime provisions are identified in License Condition (19)b of the Unit 2 Operating License, no change to the Unit 2 Technical Specification is required at this time.

The purpose of this letter is to inform you that SCE is currently evaluating the NRC policy statement on working hours and therefore will be unable to submit a proposed Technical Specification within 90 days of receipt of Generic Letter No. 82-16. The evaluation is being coordinated with the present efforts of the Plant Operations Personnel Review Committee. The Committee's report will be submitted to the NRC at least two weeks prior to exceeding 5% power on Unit 3. SCE will submit proposed Technical Specifications for Unit 2 and revised Technical Specifications for Unit 3 upon completion of our review.

If you have any questions or comments, please contact me.

Very truly yours,

M. D. Medford for KPB

Boo!
