Gentlemen:

Subject: Docket No. 50-361
Amendments 9 and 10
San Onofre Nuclear Generating Station
Unit 2

Reference: NRC-SCE letter, from R. Diggs to R. Dietch,
dated December 10, 1982

The referenced letter discusses Assessment of Fees for SCE Technical Specifications changes.

Item 1 of the letter reevaluates the submittal of August 16, 1982 from a Class II fee to a Class III fee. We have reviewed this item and concur with the NRC evaluation.

Item 2 of the letter discusses proposed changes to the Technical Specifications submitted on September 30, 1982 with a following letter on October 21, 1982. This proposed change pertained to a modification of the Turbine Overspeed Technical Specification. This modification had already been incorporated in the San Onofre Unit 3 Technical Specifications prior to the SCE proposed change for Unit 2.

For this reason we conclude that the proposed change required no additional safety evaluation over that performed for Unit 3. We would find this to be a Class I change except that San Onofre Unit 3 was not licensed at that time. Therefore, we judge this to be a Class II change. Accordingly, from the following table we determine:
