Director, Office of Nuclear Reactor Regulation
Attention: Mr. George W. Knighton, Branch Chief
Licensing Branch No. 3
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

Southern California Edison Company's (SCE) letters dated December 2, 1982 and January 25, 1983 submitted Proposed Changes NPF-10-36 and NPF-15-36 to the Units 2 and 3 Technical Specifications. These proposed changes request revisions to Engineered Safety Features Actuation System (ESFAS) response times. Because these proposed changes were not approved prior to May 6, 1983, a "no significant hazards determination" must be made by the NRC staff in accordance 10 CFR 50.92. This letter is submitted to assist the staff in making this determination and to facilitate approval of the proposed changes.

Attached is a revised description and safety analysis for Proposed Changes NPF-10-36 and NPF-15-36. The safety analysis concludes that the proposed revision of ESFAS response times does not involve a "significant hazards consideration" as defined by 10 CFR 50.92.

If you have any questions regarding the information provided in this letter, please call me.

Very truly yours,

M. O. Medford
