Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

The Southern California Edison Company's (SCE) letter dated April 27, 1984, submitted Proposed Change NPF-10/15-111 to the San Onofre Nuclear Generating Station (SONGS) Units 2 and 3 Technical Specifications. The proposed change would facilitate an exemption to 10 CFR 20 to allow radioactively contaminated oil (e.g., reactor coolant pump lube oil) to be disposed of by incineration. The NRC staff has reviewed the proposed change and has suggested revisions to make it conform to precedents set in granting this exemption for other utilities.

SCE has reviewed the suggested revisions and concurs with them. Enclosed are revised pages for Units 2 and 3 reflecting the suggested revisions. It is requested that Attachment B of the original submittal be replaced with this enclosure. A revised description of the proposed change and basis for no significant hazards consideration is also enclosed.

If you have any questions regarding the enclosed information, please call me.

Very truly yours,

M. O. Medford
