Director, Office of Nuclear Reactor Regulation  
Attention: Mr. George W. Knighton, Branch Chief  
Licensing Branch No. 3  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362  
San Onofre Nuclear Generating Station  
Units 2 and 3

References: A) Letter dated March 19, 1984 from Mr. Kenneth P. Baskin to  
Mr. H. R. Denton

B) Letter dated April 2, 1984 from Mr. Kenneth P. Baskin to  
Mr. H. R. Denton

On April 2, 1984, SCE submitted a proposed Technical Specification Change (NPF 10/15-146) which updates Technical Specifications 3/4.3.3.7 and 3/4.7.8.2 to reflect the Updated Fire Hazards Analysis (FHA). These proposed Technical Specification changes are currently pending NRC review and approval. The purpose of this letter is to provide a revision to proposed change NPF 10/15-146 to reflect an ongoing plant modification. This additional information is being provided to ensure that the proposed Technical Specification change continues to reflect the plant design.

As a result of the Control Building 70 ft. elevation remodeling, modifications will be made to the fire protection systems located in the area. These changes to the system include addition of detection and suppression equipment. These modifications affect Technical Specifications 3/4.3.3.7 and 3/4.7.8.2. The affected pages of the proposed changes for Units 2 and 3 with the required updating to reflect the additional equipment are provided as Enclosures (1) and (2), respectively. Enclosures (1) and (2) replace the corresponding pages of change NPF 10/15-146 submitted on April 2, 1984. Since the proposed Technical Specification Change has not yet been approved, NRC approval of Enclosures (1) and (2) is not required prior to completion of the Control Building remodeling.

If you have any questions, please contact me.
