Director, Office of Nuclear Reactor Regulation
Attention: Mr. H. R. Denton
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

Enclosed are three executed and forty conformed copies of Amendment Application No. 35 to Facility Operating License NPF-10 and Amendment Application No. 21 to Facility Operating License NPF-15 for San Onofre Nuclear Generating Station, Units 2 and 3, respectively.

Amendment Application No. 35 for Unit 2 and No. 21 for Unit 3 consist of the following proposed changes:

1. Proposed Change NPF-10/15-218 is a request to add a new license condition relating to an Integrated Living Schedule (ILS) for Backfits. The proposed license condition will establish the methodology for implementation of NRC required backfits for SONGS Units 2 and 3.
2. Proposed Change NPF-10/15-222 is a request to revise Technical Specification 3/4.9.6, "Refueling Machine." The proposed change will redefine the minimum capacity of the refueling machine from 3000 pounds to 3200 pounds. The overload cutoff limit will also be changed to 3550 pounds accordingly instead of 3350 pounds.

In addition, the Amendment Application No. 21 for Unit 3 includes the following proposed change:

3. Proposed Change NPF-15-219 is a request to revise Technical Specifications 3/4.1.2.7, "Borated Water Sources - Shutdown," 3/4.1.2.8, "Borated Water Sources - Operating" and the effective date for Amendment No. 32 to Operating License NPF-15. The proposed change would incorporate an additional Figure 3.1-1 applicable for the remainder of Cycle 2 and would make the changes approved by Amendment No. 32 effective upon approval of the proposed Cycle 2 figure. Additionally, Specification 3/4.1.2.7 is revised to specify

Rec'd w/Check 7/150-00

A001
3/40

Mr. H. R. Denton

that the minimum volume to be maintained in the RWST for the remainder of Cycle 2 when the plant is in cold shutdown or refueling is 7150 gallons. The associated Bases section is also revised to include Cycle 2 values.

Pursuant to 10 CFR 170.12, an amendment application fee of \$150.00 is required for each license amendment request. Accordingly, SCE's check for \$150.00 is enclosed.

Very truly yours,

Kenneth P. Bushin
