Attention: Mr. Frank Miraglia, Branch Chief
Licensing Branch 3
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: San Onofre Nuclear Generating Station
Units 2&3
Docket Nos. 50-361 and 50-362

Enclosed are six (6) copies of the National Register Assessment Program of Cultural Resources of the 230 kV Transmission Line Rights-of-Way from San Onofre Nuclear Generating Station to Black Star Canyon and Santiago Substation and to Encina and Mission Valley Substation (hereafter Cultural Resource Report), dated September, 1980. The program encompassed assessment and evaluation of forty-one (41) previously identified archaeological sites in compliance with Section 106 of the National Historic Preservation Act and as requested by the Nuclear Regulatory Commission in conjunction with the California Office of Historic Preservation.

The evaluation and assessment program was designed to document those cultural resources specifically listed in the Memorandum of Agreement (hereafter MOA), in conformance with 36 CFR 63 and the suggestions outlined in Attachment A to the MOA. The MOA was submitted to the NRC by letter dated October 29, 1979.

During the assessment program, the forty-one (41) sites were evaluated for National Register potential, using 36 CFR 60.6, 36 CFR 64 (draft), and 36 CFR 63. Site significance was assessed using contemporary criteria including those provided in 36 CFR 64 and in Advances in archaeological method and theory, edited by Moratto and Kelly (1978:1-26). Twenty-two (22) archaeological/cultural resource sites are evaluated as potentially eligible for National Register nomination. The remaining nineteen (19) sites are not considered potentially eligible for National Register nomination.

A Management Plan including measures for mitigation of potential adverse effects has been provided for the assessed sites. Mitigating measures include site avoidance and research-oriented data recovery programs when site avoidance is not possible.

Mr. Frank Miraglia, Branch Chief

-2-

With concurrence from the Nuclear Regulatory Commission and the Office of Historic Preservation, we are prepared to implement the proposed Management Plan. It is planned to review the Cultural Resource Report with key personnel from both agencies on November 7, 1980 in Sacramento, California.

Sincerely,

VP Buskin
